

What's in the box: Zoom Q2n, Power Supply, 5m Micro USB Lead , 16GB Micro SD Card

The Zoom Q2n is capable of recording very high quality audio and Video using it's wide angle lens.

1. Power Zoom Q2n on by pressing **Power/Play** button.
2. Choose a video file formatting the **VIDEO** button (1080/25, 1080/24, 720/25, 720/24, OFF).
3. You can set you shot using the **FOV** button to adjust Zoom and the **SCENE** button to adjust image colour/lighting state.
4. Set a mic **Gain** level with the **Input Volume Control** (right) and check level on meters (We recommend a peak level of around -6). For class recording you can use the **AUTO GAIN** button (press for different scenarios: Concert, Solo, Meeting, OFF)
5. Press **Record** to Start, **Record** again to stop. You can then preview your recording using **Play**
6. **Files can be copied off using the supplied USB Cable**
7. Hold down the Power/Play button to turn the device off again.
